codingbat.com

Create an account on codingbat.com, a web site that offers tons of interesting programming problems that gives you immediate feedback. There are also great help videos and tutorials that can help you learn material that you're not confident on (or that we haven't learned yet in class.)

Go to http://codingbat.com/ and create a free account. Immediately go to prefs (top right of the window) and put your name (first and last) in the Memo field and enter my email address in the teacher email field (whays@wscuhsd.org). This allows me to monitor your progress (i.e. give you credit for things you have done.) It looks like this:

Teacher Share

Enter the email address of the teacher account. This will make your done page and solution code visible to that account.

Share To   whays@wscuhsd.org

Memo

Generally this is left blank. A teacher may ask you to fill this in.

Memo   Put your name here

Update Memo

Today to get started I need you to do the following five problems under String-1:

helloName   makeAbba   extraEnd   firstHalf   withoutEnd

Here they are as they are shown on codingbat.com (do the ones that are not struck out):

helloNameH	**makeAbbaH**	~~makeTags~~
~~makeOutWord~~	**extraEnd**	~~firstTwo~~
firstHalf	**withoutEnd**	~~comboString~~

Make sure you are logged in before you do these or you won't get credit for doing them.

Please finish these today.
