

Make 2: Tuesday/Wednesday Tinkercad assignment

Due: 4th period: Tuesday 9/14

5th period: Wednesday 9/15

Please create something really cool in Tinkercad. This cannot be a project you already created in a previous year or on your own time. This is something you create today.

Instead of turning this in as an STL file, please click the person with the plus sign, generate a link, copy the link, and turn the link in on the Google Classroom.

Also, call me over to see it in person before class is over.

If you have a different personal project that you would prefer to work on, let me know right away, we'll briefly discuss it, and I will excuse you from this assignment.
