

Day18 Origami

Due, all classes, Wednesday 9/23/20 by midnight

Your task today is to make one of four choices of origami folded paper projects. Here is a link to the instructions: <https://origami.me/diagrams/>

The four choices are here:

Butterfly

Crane

Jumping Frog

Masu Box

To do any of them you need a square piece of paper. If you don't have a square piece of paper [here is a web site that shows you how to make a square piece of paper.](#)

Once you have a square piece of paper please make one of the above options. The box requires two pieces of paper, but the rest only require one.

When you are done take a photo of your creation and turn that photo in on the Google Classroom here for this project. You can take a photo using your Chrome book (click the circle, type "Camera" and the camera app opens), or using a cell phone (then send the photo to your school email address), or get someone else who has email on their phone to take the picture and email it to your school email address.

If you get stuck, here are links to Youtube videos on how to make an origami [butterfly](#), [crane](#), [jumping frog](#), and [masu box](#).

Good luck!
