

Project Make: Instructables.com web site quick review
Due: Wednesday 11/4/20 by midnight, all classes

Your assignment today is to visit this web site:

<https://www.instructables.com/>

And find a fun project. Instructables has thousands of projects in various categories, from crafts, cooking, to laser cutting, electronics, woodworking, and beyond. It's full of amazing ideas.

Your task is to spend five or ten minutes digging around on this site to find a project that you think would be fun to do. You can search for a type of project using their search button (I tried "sewing", "bamboo", "laser cut", and "brine cure olives" individually, for example, and found a ton of fun projects.)

Skim through a few different projects before choosing one.

After you choose a project, copy the URL from your browser's address bar, and then go to the Google Form for today's project (a link is [here](#), and also in the Google Classroom for this assignment) and fill out the short Google Form. Submit the form and you're done.
