

Project Make

Origami: star box and jumping frog

Due: 4th period: midnight Thursday 1/28/21

3rd & 7th: midnight Friday 1/29

Today your task is to make two origami projects: a star box and a jumping frog.

1. Star box:

Make a star box out of a square piece of paper. If you do not have a square piece of paper, see [this link for instructions on how to make one](#).

[Follow the instructions in this video to make the star box](#). Remember, you can pause the video any time, and back it up if you miss part of the instructions or need to see it again.

2. Jumping Frog

Also today, make a jumping frog. [Here is a video that shows you how to do it](#).

3. Turning it in

When you are done, take a photo showing both your box and your frog or take a short video of your star box and you actually hopping the frog (into the box? keep it short and simple).

Post your photo or video here in the Google Classroom for this assignment.

Save the Frog, we're going to do a project with the frog on another day. You may use, give away, or recycle the star box, we're done with it.
