day5 more ifs
Due: Friday 8/25/23

Requirements:

- Create a new repl. Name it day5 more ifs. Put your name in a comment at the top.
- Make a while loop that will go through the numbers from 1 to 20.
- Inside the while loop, add an if/elif/else structure that does the following:
    - if the number is less than 13 it prints the number and says "less than 13"
    - if the number is greater than 13 it prints the number and says "greater than 13"
    - if the number is equal to 13 it prints thirteen stars and "yeah!" or something fun
- When the loop is over, your program prints a farewell message.

Here is a sample run:

```
1 is less than 13
2 is less than 13
3 is less than 13
4 is less than 13
5 is less than 13
6 is less than 13
7 is less than 13
8 is less than 13
9 is less than 13
10 is less than 13
11 is less than 13
12 is less than 13
************* it's thirteen !!!!!!!!!!!!!
14 is greater than 13
15 is greater than 13
16 is greater than 13
17 is greater than 13
18 is greater than 13
19 is greater than 13
20 is greater than 13
That was fun. Have a great day.
```

Remember: inside the while loop you must have an if/elif/else structure, the new thing we learned today (see slide deck for details).

Turn in an Invite/join link on the Google Classroom for this assignment when you are done.
