

Tinkercad Gasket

Due: Thursday 4/4/24 (4th and 6th periods), Friday 4/5/23 (3rd period)

This is a rubber gasket that I found on the ground. Do you know what it is? I wonder if it might be for holding a phone on a bicycle's handlebars, but I'm not sure. Anyway, your task is to design this in Tinkercad. Please make it 1mm tall.

Do the best you can. The object is about 10 cm long.

After you are done, but before you turn in the assignment, add your name in text next to your object in the Tinkercad project (so you'll have the object and your name arranged nicely on the workplane.)

Turn in a Share link when you are done (click the person with the + sign and get a share link.)
