Logo wrap-up project, part 1
Due Monday 4/15/24

Regardless of whether you finished all the prior logo assignments, this is due today:

Open your school email and see the email I sent you titled "Template for logo wrap". Download and open the attached Inkscape file "template for logo wrap.svg".

In the file "template for logo wrap.svg" put your name at the top where it says "YourName". (Double click on that text and then replace "YourName" with your actual first and last names.)

Take your favorite of each type of logo (i.e. your favorite logo 1, your favorite logo 2, etc.) and paste them into this document, scaling each so that they fit on the page and are in the right place. Select all and choose "Object to Path" from the Path menu so that fonts will be preserved. Save the Inkscape file named "yourname favorite logos.svg" and turn the file in for this assignment.

If you did not complete all of the logo families, choose your favorites for the ones you did, leave the other ones blank, and turn this in by the end of our next class. You will get partial credit.
