

Inkscape Psychedelic Text

Make 1

Due Thursday 4/18/24 (4th and 6th periods), Friday 4/19/24 (3rd period)

Use the following video tutorial to make a psychedelic text version of your name (first and last) in a square.

<https://youtu.be/XAFF7Flscjk?feature=shared>

One thing different in our version of Inkscape from the video is that you have to type "envelope" in the search field when looking for the Envelope Deformation path effect. Otherwise, it is pretty much identical to what we are seeing in our version of Inkscape.

Sample final result:

MISTER  
HAYS

Use your first and last names as the two pieces. The video shows three words, you're just doing two.

Set the color of each word to a different color and delete the outline shapes before you turn in your project. There should just be text when you are done.

Turn in your Inkscape file on the Google Classroom when you are done.
