

Earth day medallion
Make 1 and 2
Due today

Today is Earth Day. <https://www.earthday.org/earth-day-2024/>

In honor of that, we'll all be making a small medallion of paper with the following attributes:

1. Your design fits in a circle that is 4 by 4 inches.
2. Your design contains a tree
3. Your design contains another natural thing (wave, animal, plant, etc.)
4. Your design is pleasing to look at and celebrates the earth in a positive way
5. Everything in your design is red, .1 mm stroke, no fill
6. When we cut it out on the laser, all of it is a single piece that looks great. If there is text (not required) then the text does not have missing parts (like the inside part of an A or O or R.)

We'll be cutting everything out of bright colored construction paper.

Name your file with your name and "Earth day", then email your file to the laser cutter when you are ready. Also turn it in on the Google Classroom.
