

Make 2: Reporting assignment

I expect Make 2 students to be working on projects of their own choosing or doing everything that Make 1 students are asked to do. It's your choice.

Starting this week I am adding an accountability aspect to your grade: I want a weekly report on what you spent your time on.

Today's assignment is simple: think about how you'd best like to report your weekly work to me, and propose that method to me in writing. I will review all of the ideas, and choose what works best for me.

This assignment, is simple, small, and quick, and is due today:

Send me an email with the subject "Reporting" and a body that contains how you would like to report your progress to me once a week. Please use three or more sentences, and proper grammar, spelling, and punctuation. If you have any questions, come talk with me.
