Wooden Box Art for Lid
Due: 4th & 6th period: Tuesday 10/3
        3rd period: Wednesday 10/4

After you have cut out and assembled your wooden box, open the Inkscape file with your box design in it, do a Save as, and save a new file with the word "lid" in the title (For example, I might name my file "Mr. Hays box lid".

In this new Inkscape file, delete all the pieces except the box lid (the largest rectangle piece, the top piece.)

Add art to the box lid rectangle. The art can be vector art (paths) or raster art (bipmap images, photos, etc.) It must fit easily inside in the rectangle.

Save, turn in on the Google Classroom, and email to the laser cutter. We'll engrave the images and you'll be able to take your box home.
