

Tinkercad: design this thingie

Due: 4th and 6th periods: 10/24/23

3rd period: 10/25/23

I found this thing on the ground three years ago:

I don't know what it is. That's not important, though.

I am asking you to create this thing, as best you can, in Tinkercad. [Here is a short video](#) showing all sides of it.

In its longest direction this thing is 50 mm long. It is 16 mm round. The hole on the handle end is 10 mm across. The small hole on the end pointing up in the picture above is 5 mm across. Definitely, [watch the video](#) to see all the quirks of this object.

You don't have to get it perfectly right, but the more parts of it you get right, the better your score. Try to create an object in Tinkercad that looks like this object.

When you are done **turn in a share link** on the Google Classroom. Good luck!
