

Make your own sticker
Make 1 and Make 2

I'm going to give every student one square foot of vinyl (your choice of color) to make one or more stickers.

This project has two parts:

Part 1: choose the color you want using [this Google Form](#). Do this by the end of class today. If you want to make a two color sticker, you might talk with a friend or friends and coordinate on who requests which colors. Each person will get one square foot of one color.

Part 2: make a sticker using your vinyl. The sticker must be school appropriate. You can make as many stickers as you want with your vinyl, and they can be of whatever you want. In the short run (this week) you need to make one sticker and show it to me. In the long run, you can use the rest of the vinyl over days, weeks, months, the entire school year.

Let me know if you have any questions.
