

Make a turkey

Make 1 and Make 2

Today in class, make a turkey. You can make a vinyl sticker (single or multi-color), or laser cut something out of thin wood or cardboard (thin or thick cardboard) using slots to make it stand up by itself, or not. You can use origami paper and just fold one.

Requirements: The turkey must be smaller than 2 by 2 by 2 inches. If you cut it on the laser, it must have no fill and it must use red for cutting and black for any engraving. You can use tape and glue if you want when you put it all together.

Show me your turkey when you are done with it.
