

## Make 1 and 2:

Due	Assignment Description/Instructions
Tue 3/31	Post-break assignment #1: Tinkercad letter, see PDF on Google Classroom. Turn .STL file in to the Google Classroom by the end of the day Tuesday 3/31/20.
Fri 4/3	MP02: 3D Car antenna ornament
Fri 4/3	MP03: Origami
Fri 4/3	MP04: RoomDrawing

Remember that if you have projects of your own that you would like to work on instead, I am quite flexible. Here is my note from the other day about this:

### Personal Projects

I will accept alternative individual projects in place of the normal posted assignments. For example some of you have already told me that you are building a go-cart, doing some welding, building a fence, sanding and painting, making candles, etc. It's awesome. If you are building/making/creating/tinkering with things and are willing to regularly document your work I will accept that in place of the normal assignments each week. If you are putting big effort into learning a new skill of some kind, that's also a possible replacement project.

If you choose to do your own projects I will need you to fill out the "Personal Project Form" posted on the Google Classroom. I require a paragraph describing what you are doing, the amount of time you worked on it, as well as that you email me photographs. The general rule will be that you need 2 hours of your own project work per week to be excused from the regular assignments. The personal project reports will be due by Friday each week. If you are wondering if a project would be acceptable, send me an email.
